

Cedar Slatted Panel | Bevel Edge

PRODUCT DATA SHEET

Our Bevel Edge Fencing is the original and best slatted fencing option. It has many small design features that set it apart in both appearance and durability.

Visually the angled front edge of each batten gives a far superior shadow line, this accentuates the colour variation and grain of each individual board.

On a practical note the angled front edge sheds water, so that the fencing is protected in bad weather. A further advantage of this Bevel edge slatted fencing is that it allows light to pass through the panel from behind, the angle of the bevel is such that it will let sunlight through into your garden.

This is a very important factor especially when having top of wall fencing as sometimes adding height to a boundary will cut out sunlight. This extra light makes plants, lawns and trees and people much healthier, we have seen gardens that have previously been dim and shady warmed up by the the extra light. A simple design feature like this can make all the difference to your garden space.

When The Contemporary Fencing Company was first formed this was the original fence panel that was offered and the design is the same today due to it being so well thought out.

KEY FACTS

- Brings contemporary style to your garden
- Allows sunlight to pass through the panel
- Bevel Edge Battens have superior shadow lines
- Readymade slatted fence panels
- Creates perfect horizontal lines
- No visible fixings when installed
- High Quality Western Red Cedar
