

Siberian Larch Slatted Panel | Noir

PRODUCT DATA SHEET

Cequence 'Noir' fence panels are designed to look like burnt Larch. The effect is achieved by applying Treatex stain to the Larch battens prior to the panels being constructed.

The panels come treated and ready to use and are around half the cost of real burnt Larch.

Our high quality Siberian Larch Noir fence panels are handmade in our joinery workshop. It is a contemporary style horizontal slatted panel, designed to create a continuous line of fencing with no visible posts.

These fence panels are made from hard wearing Siberian Larch and are treated with Treatex stain to achieve the burnt Larch look.

Our Noir Larch fencing panels are sold in handy 60cm and 90cm high sections that can be stacked above each other to achieve your desired fence height. If your fencing height is different you can easily trim off battens as required.

The join between stacked panels is invisible so it will look like a single panel once installed. We make panels in these handy sizes for ease of transport.
