

# Red Cedar | Slatted Fence Panel

# PRODUCT DATA SHEET

If you are looking to introduce a contemporary fence to your garden, our Red Cedar slatted panels are the perfect option.

They are designed to fit together to create a seamless fence with no visible posts. A continuous line travelling around your garden brings a sense of order and calm to outdoor spaces.

The warm Cedar colours are also the perfect backdrop to plant against, or a wonderful foil for sculpture or water features. Create the right look, first time with ease, with Red Cedar slatted fencing.

Our patented Cequence fencing system takes the hard work out of having a slatted fence. The panels are readymade in handy sizes that will fit perfectly together giving you a high quality finish every time.

Cequence fencing panels are sold in handy 60cm and 90cm high sections that can be stacked above each other to achieve your desired fence height. If your fencing height is different you can easily trim off battens as required.

The join between stacked panels is invisible so it will look like a single panel once installed. We make panels in these handy sizes for ease of transport.

## KEY FACTS

- High quality Western Red Cedar
- Brings contemporary style to your garden
- Readymade slatted fence panels
- Creates perfect horizontal lines
- No visible fixings when installed
- Easy and accurate installation every time
- Built with 44mm x 17mm Cedar battens
- 7mm gaps between Cedar battens
- Built with stainless steel fixings
- Handmade and hand finished
- Hundreds of happy customers

Product Specification	
Brand	Cequence
Construction Material	Western Red Cedar
Batten Style	Slatted Fence Panel
Finish	Planed all Round
Gap Size	7mm between Battens
Grade	Clear Grade 2 or Better
Country of Origin	Canada
Quality Control	Exceeds NLGA Grading Rules
Panel Construction	Hidden Stainless Steel Ring Shank Nails
Guarantee	20 years

# Red Cedar | Slatted Fence Panel

# PRODUCT DATA SHEET

The rise in popularity of slatted fencing has been huge. One of the reasons for this is that the strong lines of horizontal fencing contrasts so well against plants and natural elements.

It is a real case of opposites attracting! On the one hand you have the strong structural lines of horizontal fencing and the other hand the natural form of plants and trees, together they just work!

But why is horizontal slatted fencing so appealing to look at? Well we think it may have a lot to do with the shadows between each strip of wood.

These shadows act as a separator allowing your eye to perceive each individual board. This is further highlighted when these boards run around the garden uninterrupted.

Combine this with the wonderful varied colours of Western Red Cedar and it just becomes something really special.
