Our Venetian Slatted Fence Panels are the perfect option if you are looking for great quality and price. Made from treated Scandinavian redwood in our UK based workshop. The Redwood timber is pressure treated to protect it from the elements also giving it an attractive colouring that still allows you to appreciate the wonderful wood grain. You can be rest assured that this really is the best treated softwood you will find on the market.

Venetian slatted fence panels are a contemporary style horizontal slatted panel, designed to create a continuous line of fencing with no visible posts.

The Redwood battens are 44mm x 18mm and there is a 7mm gap between each batten.

These fencing panels are sold in handy 60cm and 90cm high sections that can be stacked above each other to achieve your desired fence height.

If your desired fencing height is different you can easily trim off battens as required. The join between stacked Venetian panels is invisible so it will look like a single panel once installed.

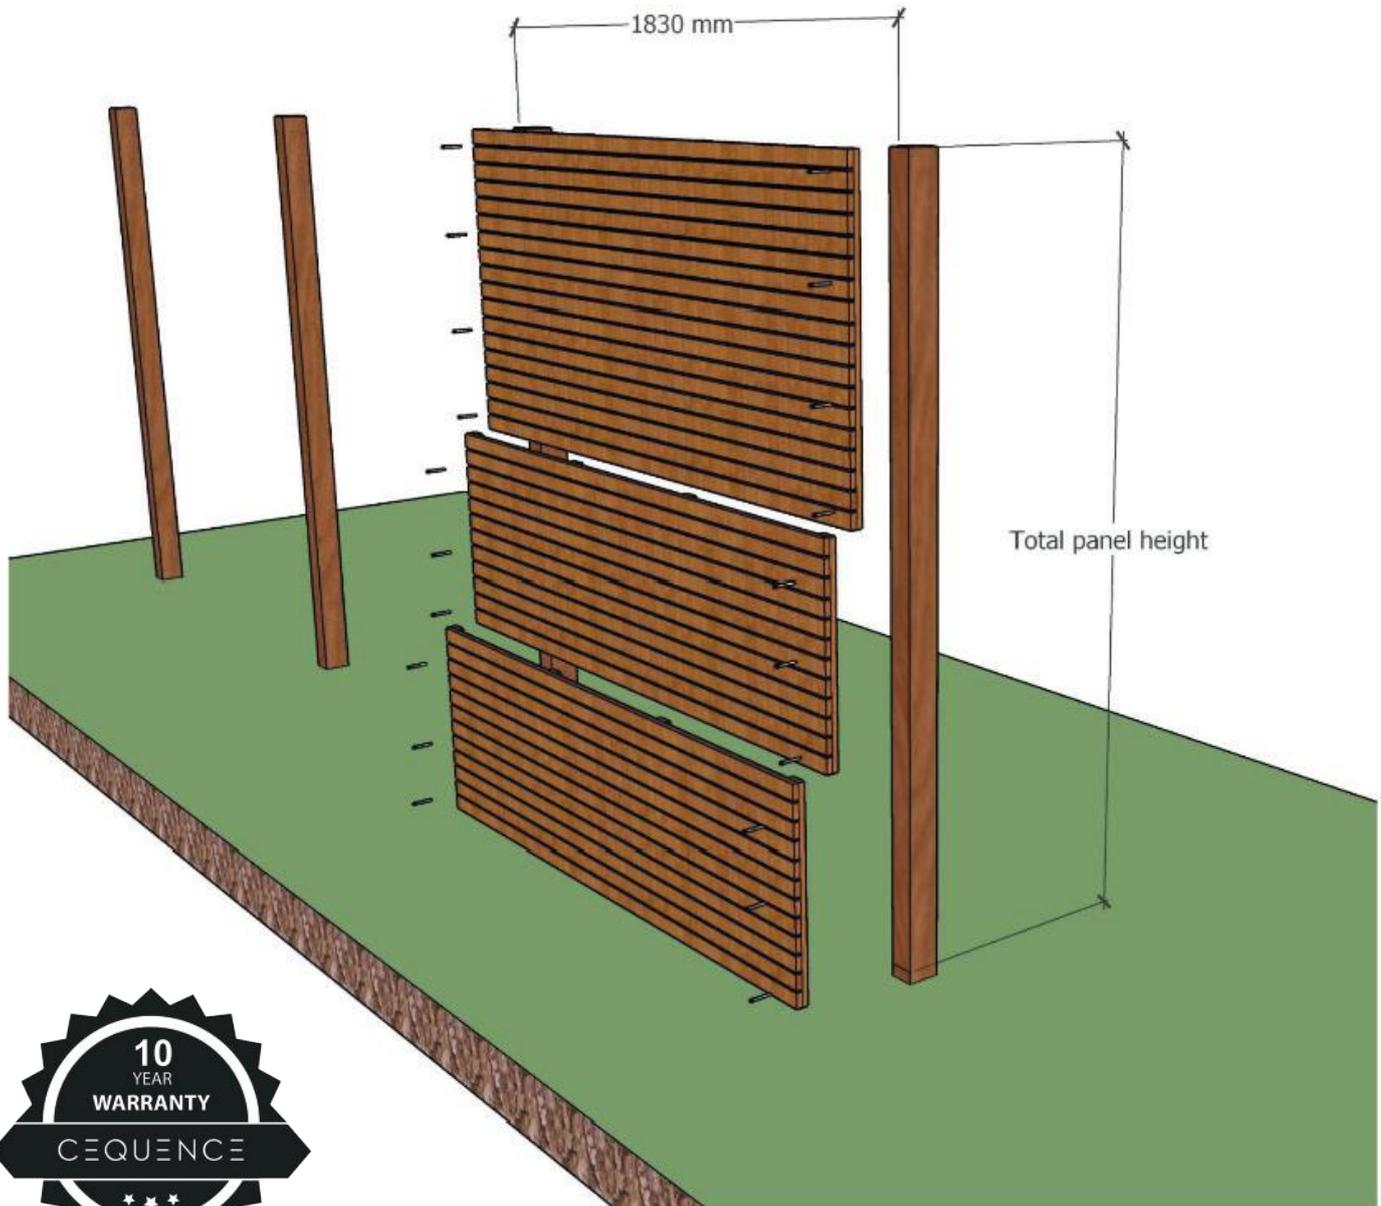

KEY FACTS
