

Perfect for a quiet garden read.

Our beautifully made garden seating will suit your garden perfectly. Made from stunning Western Red Cedar it add will the finishing touch to any garden space.

Our Cedar outdoor seats are the ideal choice if you are looking for a simple to install bench that looks stunning in any garden setting.

There are lots of ways this Cedar bench can be installed, The most popular two options are bolting it to a wall to create a floating bench or installing it on top of wall.

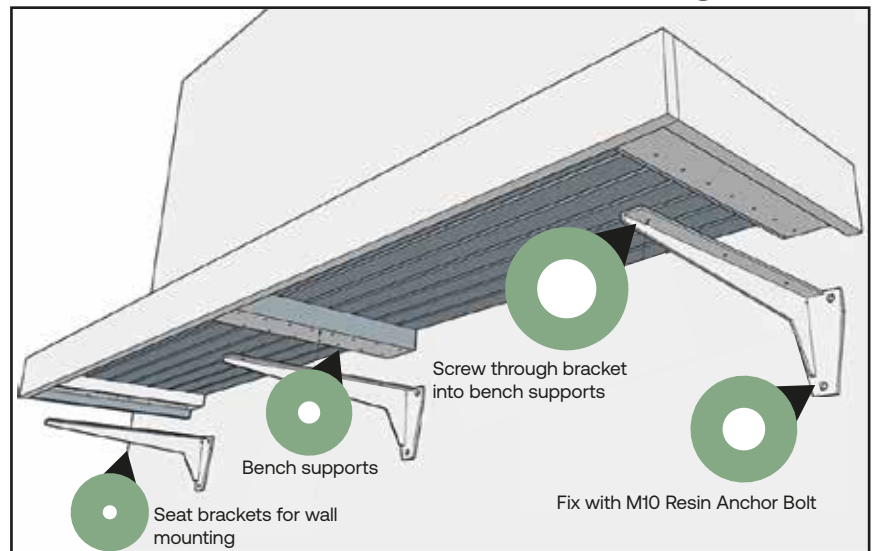

Our Corner seating units also match perfectly with this straight bench, so if you want to have extra long sections of seating you can simply add more benches alongside each other.

You can also request which sides of your bench have fascia on. As standard we supply the benches with fascia on the front and ends, but sometimes you may also need it on the rear too, if this is the case just let us know.

A floating bench can easily be achieved using our bench seat brackets. The floating bench is normally fixed against a brick or block work wall using metal brackets that are bolted in place. The bench will have a wide enough front fascia to hide the brackets giving it the effect of floating with no support. You can find our seating brackets in the seating or ironmongery sections of our online shop.

Also fantastic as a floating bench!

KEY FACTS
