

Our Venetian Fence Panels are the perfect choice if you are looking for great quality at a great price.

About the panels

Made from treated Scandinavian Redwood in our UK based workshop. The Redwood timber is pressure treated to protect it from the elements while giving it an attractive colouration and maintaining the beautiful wood grain. You can rest assured that this really is the best treated softwood you will find on the market.

The slatted look of Venetian fence panels is a very popular style of fencing. It works in both contemporary and traditional gardens. We have carefully selected the timber for these fence panels. It is unsorted grade redwood. This means it has minimal knots and is quality controlled. The natural colouring also sets these panels apart.

Venetian fence panels are a contemporary style horizontal slatted panel, designed to create a continuous line of fencing with no visible posts. The most popular way of fitting these panels is to have them fixed to the front of the posts so that you don't have a break between each panel. The double sided hit and miss panels can be fitted into slotted concrete posts or between timber posts too.

The Redwood battens are planed on all four sides and have eased corners.

Finish	Planed all round
Gap Size	Single sided 7mm - Double sided 20mm
Grade	A grade
Country of Origin	European
Quality Control	CFC in house
Panel Construction	Hidden stainless steel ring shank nails
Guarantee	10 years

Pressure Treated

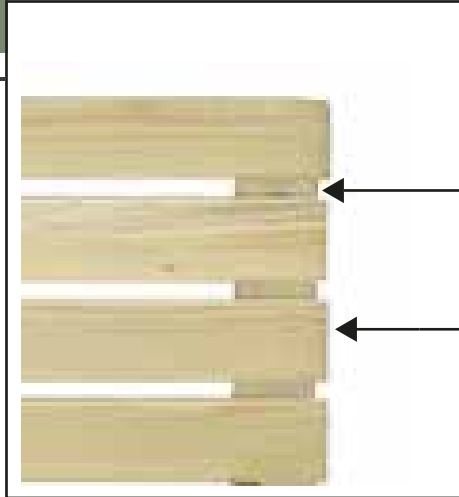

Single Sided Venetian Redwood Fence Panel

The single sided Venetian Redwood allows light to freely flow through its gaps but still offers excellent privacy. When looking at the rear of the panel the vertical supports and posts are visible.

Cequence | Pressure Treated Venetian Redwood Fencing | Single Sided

Height (cm)	Product Code	Width (mm)
60	RWP60-1	1795
90	RWP90-1	1795
120	RW120-1	1795
150	RW150-1	1795
180	RW180-1	1795

Pressure Treated

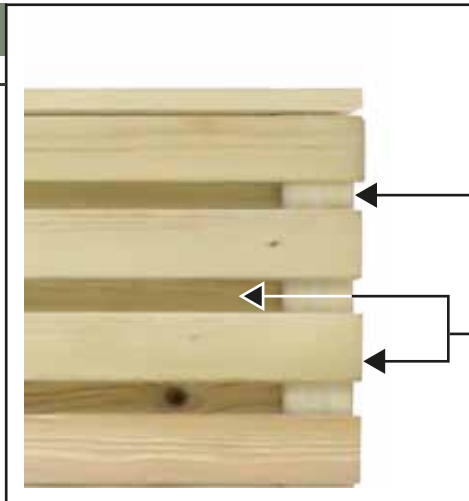

Double Sided Venetian Redwood Fence Panel

The double sided Venetian Redwood fence panel offers battens on both sides. The battens are positioned in a hit and miss configuration to offer excellent privacy. Notice the lack of light coming through the gaps between the battens in the picture on the right.
