

**Finally, a double sided fence that has no visible posts and is only 70mm thick. Our revolutionary double sided fencing provides the perfect solution.**

In some circumstances both sides of a fence need to look exactly the same, this may be because a neighbour wants the same look or simply that you can see each side and want a uniform finish. If you wish for complete privacy fencing, we have a hit and miss style fencing option available.

The pictures show our double sided fencing system that comprises of four parts - a double sided panel a metal post, a capping rail and an end cap. All parts are sold separately. Posts, capping rails and end caps are also available on our online shop.

Our Cedar double sided slatted fence panel comprise of two Cedar panels that are fixed back to back. Our double sided fence posts sit inside the two panels giving a seamless finish on both sides with no posts visible. You can order double sided posts from the post section on our online shop. We offer both standard posts and top of wall posts for our double sided fencing. Our capping rail fits on top finishing the panels perfectly.

The other great advantage of our double sided fencing is that it has a thickness of only 72mm! As the post is actually inside the fence panel it makes the fencing much thinner. Our double sided posts are made from galvanized steel to keep the fencing strong but also slim so it will not take up too much space.

We also offer double sided panels made measure for bespoke projects. Our double sided fencing can even be used as a balustrade please contact us for details on this.
