

Cequence | Red Cedar Fence Panel

PRODUCT DATA SHEET

Cequence Red Cedar slatted fencing panels are perfect for creating the contemporary look

Our patented Cequence fencing system takes the hard work out of having a slatted fence. Transform your space and bring a modern look to your outdoor space.

Grade A - Our Cedar panels are made from high quality Canadian Red Cedar that is selected for quality. When you purchase an A grade Cequence panel you can rest assured that you have a fence panel that is made from the best timber we have. Both sides of your Cedar panel will have a planed smooth finish.

At Contemporary Fencing we take pride in producing well designed and thought out products. Cequence cedar slatted fencing panels are sold in handy 60cm and 90cm high sections that can be stacked above each other to achieve your desired fence height.

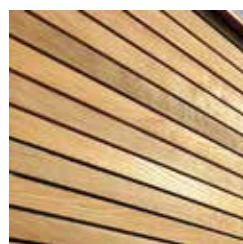

If your desired fencing height is different you can easily trim off battens as required. The join between stacked panels is invisible, so it will look like a single panel once installed. We make panels in these handy sizes for ease of transport.

Red Cedar will age into a beautiful silver,

but colour can be maintained with regular maintenance.

For more information, refer to our "Cedar Fence Care" product data sheet.
