

Our Venetian Privacy Panels are the perfect option if you are looking for great quality at a great price. Made from treated Scandinavian Redwood in our UK based workshop. These fencing panels offer complete privacy with no gaps between the battens.

The slatted look of Venetian fence panels is a very popular style of fencing. It works in both contemporary and traditional gardens. We have carefully selected the timber for these fence panels. It is unsorted grade redwood. This means it has minimal knots and is quality controlled. The lovely colouring also sets these panels apart.

Venetian fence panels are a contemporary style horizontal slatted panel, designed to create a continuous line of fencing with no visible posts. The most popular way of fitting these panels is to have them fixed to the front of the posts so that you don't have a break between each panel.

This panel has the option of an open slatted top or a full privacy panel. So you have the flexibility to allow light in or opt for a private fence.

These panels are sold in handy 60cm and 90cm high sections that can be stacked above each other to achieve your desired fence height. If your desired fencing height is different you can easily trim off battens as required. The join between stacked Venetian panels is seamless so it will look like a single panel once installed.
